PROFESSIONAL SUMMARY

DevOps & Automation Engineer with 4+ years of experience in building scalable CI/CD pipelines, cloud-native applications, and infrastructure automation on Google Cloud Platform (GCP). Skilled in Python, Go, and Kubernetes, with a strong focus on improving deployment reliability, reducing manual effort, and enhancing system observability. Experienced in developing internal tools, monitoring systems, and production-ready microservices for high-availability environments.

CORE SKILLS

- **Programming:** Python, Go, JavaScript
- **DevOps Tools:** Docker, Kubernetes, Jenkins, Terraform
- **Cloud:** Google Cloud Platform (GCP), Cloud Run, GCE
- **Monitoring:** Prometheus, Grafana, Icinga
- **CI/CD:** Jenkins, Cloud build
- **Other:** Linux, Bash, Automation, Logging

PROFESSIONAL EXPERIENCE

DevOps Engineer (Automation & Cloud)

Fournine Cloud Solutions

08/2021 – Present

Hyderabad, India

- Automated SSL certificate lifecycle management across Kubernetes, load balancers, and VMs, reducing manual effort by ~80% and improving deployment reliability
- Designed and integrated incident management workflows between Icinga and Jira, improving response time and operational efficiency for SRE teams
- Developed CI/CD-driven release automation pipelines, reducing deployment errors and enabling faster, reliable production releases
- Built JOVI, a real-time Jenkins pipeline monitoring tool, significantly reducing debugging time by identifying failure causes and mapping them to commits and developers
- Deployed and managed cloud-native applications on GCP (Cloud Run, GCE, Load Balancers, GCS), ensuring scalability and high availability
- Developed monitoring dashboards and internal tools to enhance observability and support data-driven decision-making

Tech Stack: Python · Go · Docker · Kubernetes · Jenkins · GCP · Terraform · Icinga · Prometheus · Grafana

PROJECTS

SSL Certificate Orchestration Tool

- Automated SSL lifecycle across Kubernetes, Load Balancers, and VMs, reducing manual effort by ~80%
- Integrated certificate renewals into CI/CD pipelines

Tech: Python, Go, Kubernetes, Docker, Jenkins

JOVI – Jenkins Job Visualization Tool

- Built real-time CI/CD pipeline monitoring tool to detect failures and map them to commits and developers
- Reduced debugging time and improved deployment visibility

Tech: Python, Django, Jenkins, JavaScript

CI/CD Release Automation Framework

- Automated production deployments, reducing errors and improving release speed
- Standardized deployment workflows using scripting and containers

Tech: Jenkins, Python, Shell, Docker, Git

GCP Cloud-Native Deployment System

- Deployed scalable applications using Cloud Run, GCE, Load Balancers, and GCS
- Improved system availability using containerized deployments

Tech: GCP, Docker, Jenkins

Automated Incident Management (Icinga → Jira)

- Automated alert-to-ticket workflow, improving incident response time
- Reduced manual effort in monitoring and issue tracking

Tech: Python, Icinga, Jira, Rundeck

CERTIFICATION

Google Associate Cloud Engineer (GCP)

Expires on Oct, 2027

EDUCATION

Diploma in Computer Science

Government Polytechnic, Changipur Noorpur
2016 – 2019 | Bijnor, Uttar Pradesh
